# Optimizing Your Travel Spend: Unlocking The Potential Of Your Data

Smart Data. Powerful Solutions

COMPANY OVERVIEW

Data Visualization Intelligence (DVI) utilizes advanced data science techniques to purify disparate travel data into impactful visualizations, which expedite the analysis of total travel spend and provide a higher level of insight into your program.

BENEFITS OF DVI

DATA
- Understand complete travel program including all costs
- Identification of total cost of travel with absolute accuracy
- Improved data quality for confident decision making

VISUALIZATION
- Analyze complex data in easily understood format
- Single dynamic platform for all stakeholders
- Identify trends and take corrective action

INTELLIGENCE
- Enable next-level analysis and maximum savings
- Achieve a higher level of insight than with dated reporting tools

DATA OVERVIEW

Data is brought in from all your sources without any need for any manipulation. We have experience with virtually all data sources.

Expense Data   **HR/Traveler**   **Industry Benchmarks**

TMC/Back Office   **Credit Card Data**   **Budget Data**

VISUALIZATION OVERVIEW

Visualizations present complex data sets in a graphical form which accelerates the identification of patterns, trends, and correlations that may go unnoticed in old-school reporting, tables, or spreadsheets.
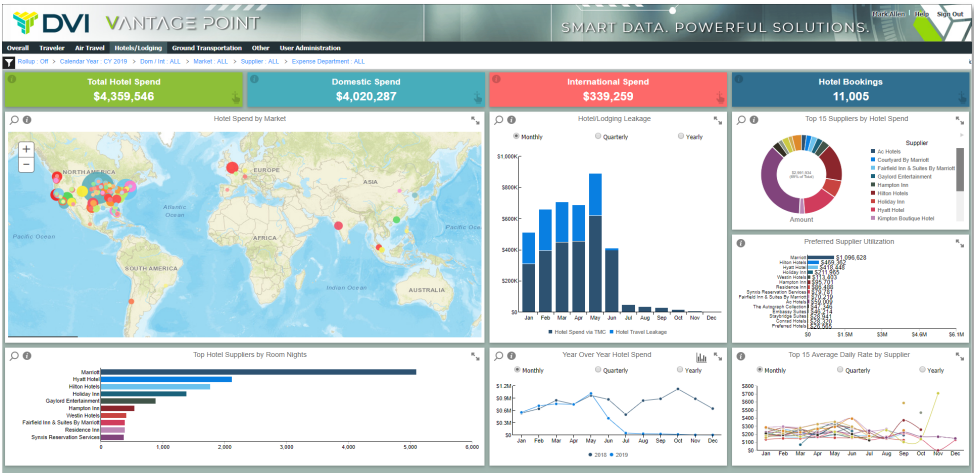

Discover hidden insights in your travel data with DVI's rich interactive visualizations.

Quickly identify answers to ad-hoc questions with DVI's advanced filtering and drill down capabilities.

Proactively manage compliance, preferred supplier spend, and your overall travel budget.

INTELLIGENCE OVERVIEW

With complete, accurate data and informative visualizations, you can identify new insights into your Travel Spend, programs and policies to drive costs savings.

RESULT EXAMPLES

Analyzed out of program spend, reasons for difference in price, and implemented changes to travel policy saving 6% of air travel costs.

Analyzed meal spend per region and identified savings opportunities through market specific meal cap modifications saving over $250K annually.

Accurately captured all out of program spend, identified root causes, and implemented policy changes to drive savings of over $150K per year

Identified over $200K in annual savings by shifting taxi vs rideshare volume based on specific locations.

Identified potential volumes to shift and leveraged total spend including ancillaries for additional savings in contract negotiations.
